

MWM EXTERNAL PROBE – HOW TO CHANGE THE BATTERY?

1. Remove **BOTH** end caps off the white tube as follows:

2. Remove / slide the circuit board from inside the white tube (DO NOT disconnect the sensor that is attached):

3. Take out the old battery (take note of which way the battery is to be inserted - **Positive points to the wires**). **Now fit the NEW Battery.**

4. Slide the circuit board back into the white tube and replace / tighten both end caps.
5. **Place your MWM Sensor back into your Fridge / Freezer now**
6. LOGIN to the MATOS Monitoring website - <https://matosmonitoring.com/> and check you can see your fridge / freezer temperatures coming through live!
